

INSTITUTE OF HEALTH, WELLNESS & MEDICAL TECHNOLOGY

The Health, Wellness and Medical Technology Institute will teach skills needed in the areas of health sciences, wellness and technology related health fields. The knowledge and skills learned in this program will enhance the student's opportunity for placement in entry-level jobs and/or continuing education.

Students completing the institute studies are able to:

- Work effectively as a team member
- Work effectively with the general public
- Listen and communicate effectively
- Write effectively and proficiently
- Analyze problems and develop solutions
- Coordinate and demonstrate healthy lifestyles

In the classroom, studies include:

- Participation in different fitness programs
- Developing fitness programs
- Developing a working knowledge of nutritional facts
- Develop an understanding of the human body and how it works
- Develop knowledge of jobs, both entry level and post secondary, related to the health, wellness & medical technology fields

Some of the related occupations include, but not limited to:

- Athletic Trainer
- Physical therapists
- Nurse
- Dentist/Dental Hygiene
- Physician/Physicians Assistant
- Recreational therapists
- Emergency Medical Tech (EMT)
- Pharmacists
- Home Health Aides
- Paramedic
- Teacher (Health/PE/Science)
